University of the West of Scotland – Laboratory Media Towers

Quadra AV Furniture can design, manufacture and install all types of media towers.

The above project was for The University of West Of Scotland. The team at the University were already installing the laboratory benches when they asked Quadra in to discuss the screen housings.

The housings needed to hide all the cables and be totally enclosed. Once we have reviewed the benches we suggested using the Alliance Towers. These already incorporate a screen shield which hides the screen mounting and cable connections. All the cables were routed through the tower and into the bench as per their specification.

Quadra can make the signage and media towers can be manufactured from powder coated mild steel, or constructed in wood with either a melamine finish or a vinyl wrap.

## Description: Adaptive FW - floor to wall

The Adaptive FW (floor to wall) is a versatile solution for a large screen. A video conference shelf can be mounted to the front. The front lower panel below the screen is removable via 2x cylinder locks. Steel frame work which is powder coated silver or black. The steel work can also be powder coated to any RAL colour at additional cost. Capacity for single screens from 40" to 85". Easy access to video conferencing codec or other equipment.

Optional extras include a VC shelf.
Sizes do not include screens.

Product Code:
ADAPTIVE-FW-MEL
ADAPTIVE-FW-VEN

Approximate size (mm)
Height   1800mm
Width   920mm
Length   195mm
No Base

Description: Adaptive single screen VC stand - free standing

The Adaptive FW (floor to wall) is a versatile solution for a large screen, you can add a shelf for a video conference camera to the front. The front lower panel below the screen is removable via 2x cylinder locks. Steel frame work which is powder coated silver or black. The steel work can also be powder coated to any RAL colour you specify but may be a small charge applied. Single screens from 40" to 85". Clean, simple design without clutter. Easy access to video conferencing codec or other equipment. Hard-wearing powder coat steel work and front / back panels in either standard melamine, veneers, vinyl wraps / colours.
Optional extras include a VC shelf.
Sizes do not include screens.

Description: Bespoke digi towers

Here at Quadra AV Furniture we can design a bespoke Digi tower for reception area or foyer. It can be a custom size, shape or finish.

The Digi tower below right features a coloured back ground behind the screen which can match your corporate branding.

The Digi tower below left is a full circle with 3x screens so people coming into the foyer or reception can see a screen from any direction.

We can create any unit with a bespoke finish to specification whilst allowing for the integration of all audio visual components.

Your logo can be added below the screen

Quadra AV Furniture source the highest quality hardwoods and real wood veneers. The varying grain and figure of these woods genuinely emphasise the natural beauty and individuality of the material. No two pieces of timber are identical and there will be natural variations in the grain, knots and colouring. This arises from natural minerals in the wood.

If you have a specific finish in mind please contact us with details and we will source samples for you.

We work with all the main manufacturers including Kronospan, Egger and Formica.

We also work with specialist veneer companies who have a vast array of stock from exotic, bold, warm, fresh and modern veneers.

Decorative laminate is a mainstay of commercial interior design and Quadra can offer the latest designs and textures as well as classic best sellers.
Over 26 years of experience within the audio visual furniture industry and with a reputation for being friendly and reliable to deal with, we treat every project with the same level of importance.

Our furniture is manufactured at our York facility which you are welcome to visit and see your project in the build process or just to have a look around.

You will be able to see the high level of investment in technology and the deep passion we have for what we do.
