

Making furniture fit for av

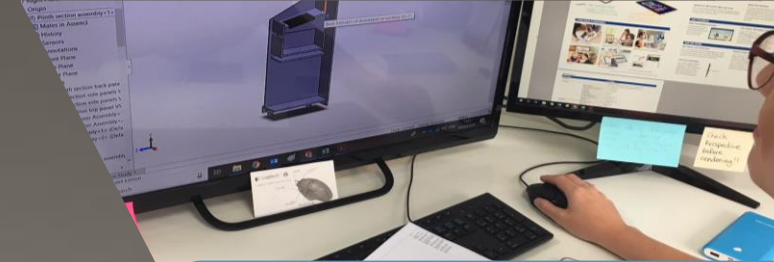

About Us

- Based in York, with over 28 years experience, we have experienced designers, joiners and installation teams
- Quadra provides a comprehensive range of bespoke AV furniture and cabinets. Along with high quality furniture for board rooms and meeting rooms we have designed – supplied & fitted out full libraries, moot / mock courtrooms and much more.
- Have your clients asked you about improving room Acoustics? look no further! We can assist you with site surveys, layout designs and acoustic reports, so you can offer this as a service to your customers. We offer a full install service or if you wanted to install yourselves we can help your install team on the first install.
- We partner with you to offer a full service for your clients furniture requirements
- Let us take the pain out of the process for you!

AV Integrators / Office Fit Outs

- Most AV Integrators are missing out on the massive potential earnings furniture can add on to every project!
- Quadra AV works in partnership with you to maximise these opportunities
- Within the office fit out, companies are installing tables and media walls which don't have cable ways and cause issues when fitting. We take all this into account and design the furniture around the AV equipment!
- From acoustics, tables, media walls to small AV cabinets we can supply and install any type of furniture you require.
- We supply life-like CAD designs to bring your client's vision alive
- From client visits and site surveys through to install / hand over we are there with you every step of the project

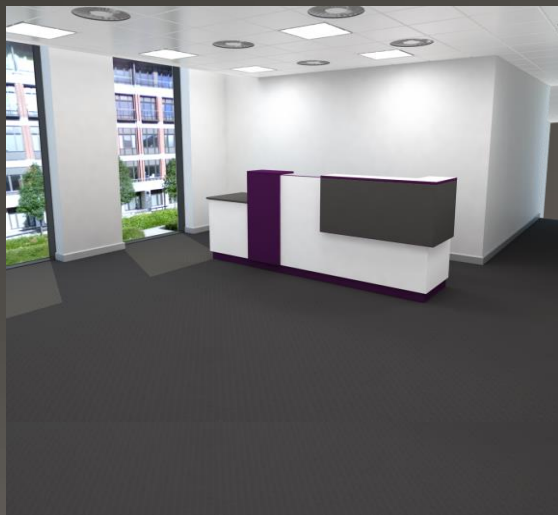

Reception Desks

Quadra AV Furniture has a huge range of designs available, or we can design one for you.

If you have a design already worked up for the project but require someone to make and install, then look no further!

We have a large range of colours and materials to choose from. We can also supply logos, lights, inserts, AV / power cut outs...

Here are a few design ideas of reception counters. We can produce a 3D render so you can see the finished item before we start manufacture.

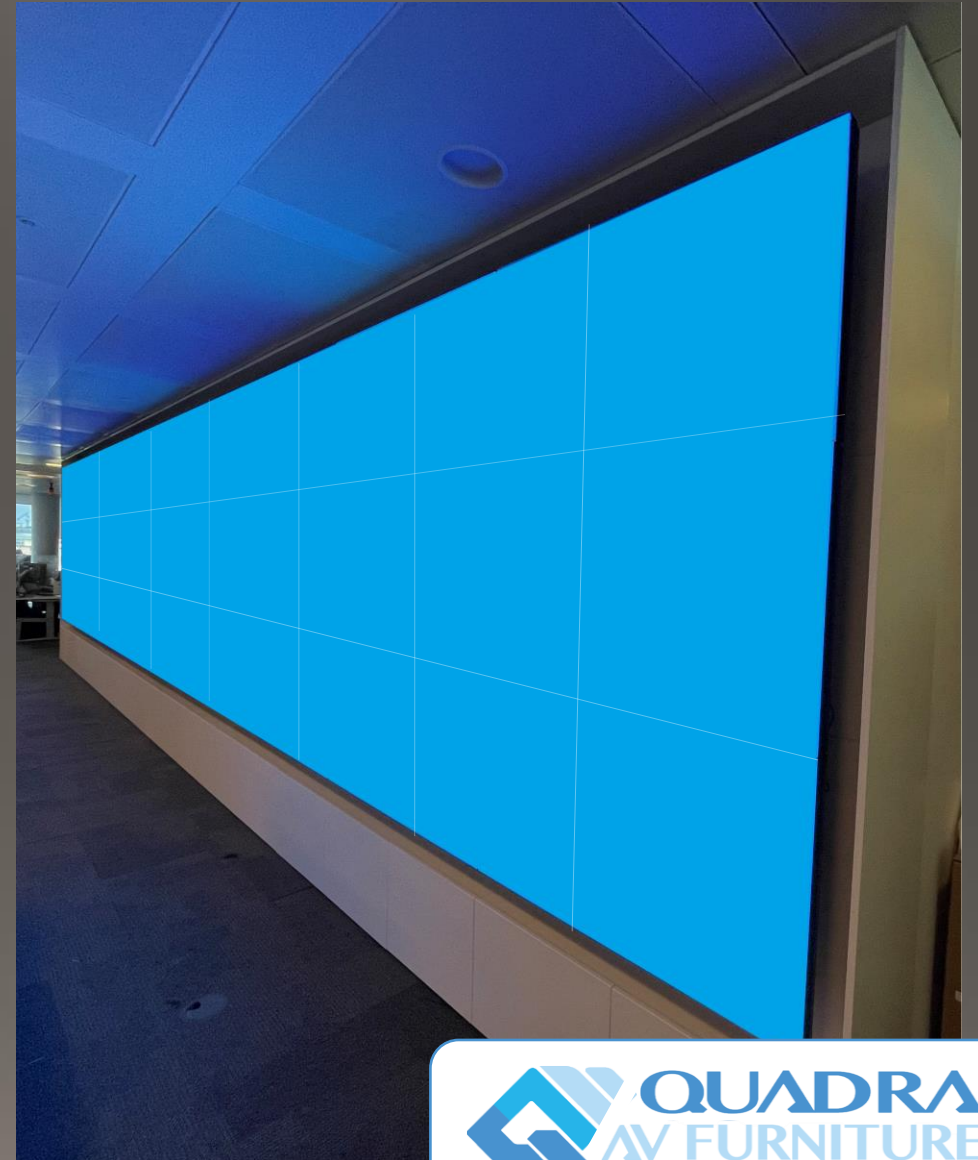

Media Walls / Surrounds

- Whatever the size of the room and AV kit selection, Quadra can design and manufacture custom screen surrounds that not only look great but are designed with AV installation and servicing in mind.
- Working with numerous AV integrators throughout the years, we understand the need for cable routing from screen, speakers or video conference equipment through to your audio-visual equipment rack or server room.
- Within the media walls we build in access panels, doors etc. which not only helps the install but also servicing the equipment for your future maintenance needs .
- We have vast experience in commercial AV installations, not many builders know that some screens have a recommended gap all around for ventilation. This can have an effect on warranties.
- Our team are skilled carpenters who will be on site for the install. If a last-minute change or any adjustment is required, our team can adjust and adapt.

27 Screen Media Wall

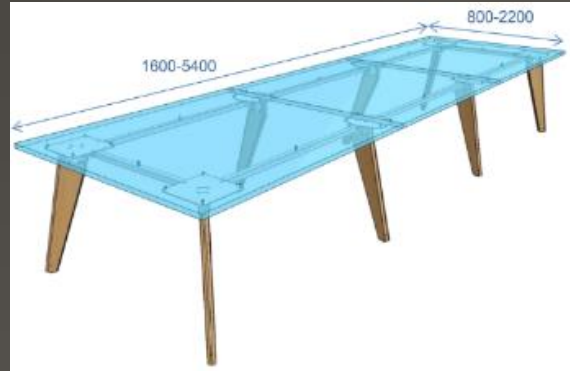

Office Desking

Not only can Quadra manufacture bespoke furniture like a one-off boardroom or meeting room table, we can also supply and install the ever-popular standard office desking. These can be fixed height or height adjustable.

We have a large range of designs available from steel legs to a wooden box base to hide all your cables.

Utilising the steel frames, we can match the worktops to any other item of furniture we supply so your office looks the same throughout.

We have a range of colours and finishes from standard melamines, laminates & veneers.

We have found that the majority of customers want to work with just one company to supply their furniture, a one stop shop. Quadra can project manage or supply your preferred appointed fit out company. We can also supply office chairs and AV / mains power to desks.

Height Adjustable and Folding Desking

Height Adjustable

Bespoke cable towers designed to fit your cubbies.

Folding Tables

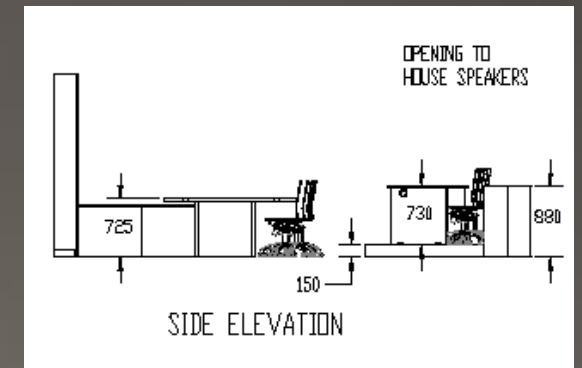

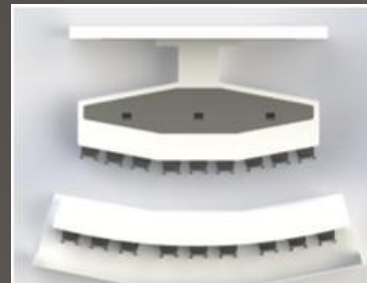

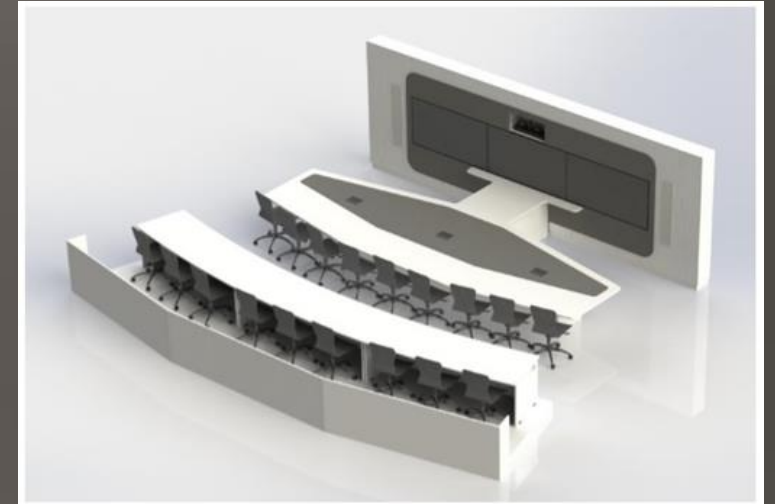

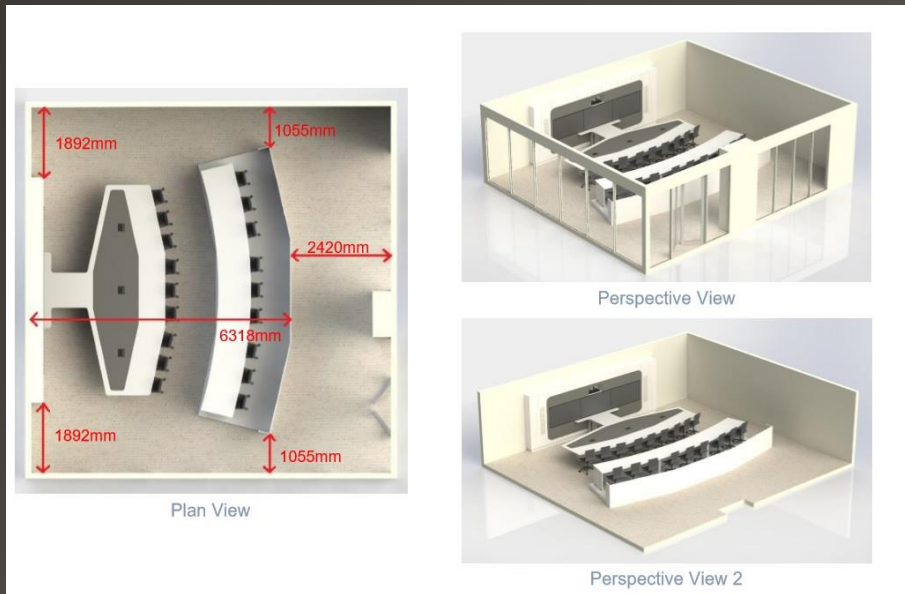

Telepresence Furniture: Design

TELEPRESENCE SUITES ACROSS EUROPE for LARGE PHARMACEUTICAL company

Client Brief :

To create a clean modern 18 seat telepresence suite that incorporates all the latest VC & AV technology, which gives the users a comfortable and user-friendly experience no matter where you sit in the room

From initial enquiry we will support you at every stage
Once a concept idea is agreed, we will come out and complete a full site survey of the rooms for each site

When completed, our design team create a DWG CAD Drawing to incorporate the AV you will be using on the install. As part of this we scale and design the furniture to ensure the furniture works within the space

Telepresence Furniture: Managing & Manufacture

Planning and execution

We have regular conference calls throughout the entire project life cycle so we can liaise and get to know the Project Managers' and engineering teams' needs on the project

Our designer will work with your technical designer to incorporate all the AV spacing and fixing requirements including cable routings you need

Working in partnership with you from day 1 ensures ongoing continuity between the teams and with sign off at each point this insures there are no hidden surprises on site

From the offset we will always be open and honest about a realistic installation date and once this agreed will make sure we hit that all important install date for you and the client

Telepresence Furniture: The Install & Hand Over

Quadra's install team will work closely with your onsite AV (Audio Visual) installation team from start to finish.

We will help and make sure all your cable ways are where they need to be and advise how to access them.

Once Quadra has finished our part of the install, we will ask either the AV integrator or the customer to check over the furniture to make sure it's all ok and then sign off the work sheet.

Acoustic Solutions

We offer a wide range of acoustic solutions, from acoustic walls to ceiling rafts and baffles.

From site surveys to acoustic reports, we will support you and your customers with every step of the acoustic journey.

Acoustic Solutions

High Quality Acoustic Absorbers

Following a site survey, we calculate your room reverberations before treatment.

We work up a report giving an acoustic solution which includes plans of recommended panel placement and design.

You can't hear the transformation by looking at photos, so we have created a video..... https://youtu.be/vXE-6_OFq-c

Acoustic Solutions

The project shown below used A rated Acoustic ceiling panels. These are ideal when you have no wall space or low ceilings.

The project below used A rated Cara fabric panels which have a wide range of colours. We offer printed logos or photos; the Strive Logos are printed across A rated acoustic panels

We offer a range of easy to install acoustic panels & rafts that can be used to treat ceilings and walls to reduce reverb and echo. They are ideal for meeting rooms and video conferencing areas as well as large open spaces like lecture theatres. Available in large range of shapes, colours and finishes or Printed

Movable Wall Acoustic Solutions

We offer a range of movable acoustic walls with a wide range of fabrics and colours.

These walls offer flexibility and acoustic improvement, ideal for open plan offices or multipurpose meeting / office spaces

Collaboration Tables

Collaboration is a real buzz word at the moment, at Quadra we have developed several solutions designed to encourage collaboration and make best use of the space.

TP table with separate screen unit

Quadra has a range of collaboration furniture which can be tailored to your exact requirements in any finish.

The TP product offers a single media screen surround with a single wide table, this can be scaled up for larger screens and users. The Alliance range offers a more traditional meeting table with a separate screen tower.

Alliance table with separate alliance screen tower

Collaboration Tables

Collaboration is a real buzz word at the moment; at Quadra we have developed several solutions designed to encourage collaboration and make best use of the space.

Alliance 5 table with screen tower attached

WorkZone 5 table with integral screen tower

Quadra collaboration tables accommodate seats as standard 3, 5, 7, 9 & 11 but we can alter to your requirements.

We offer a large range of finishes and tabletop shapes.

Collaboration Tables

Alliance

Workzone

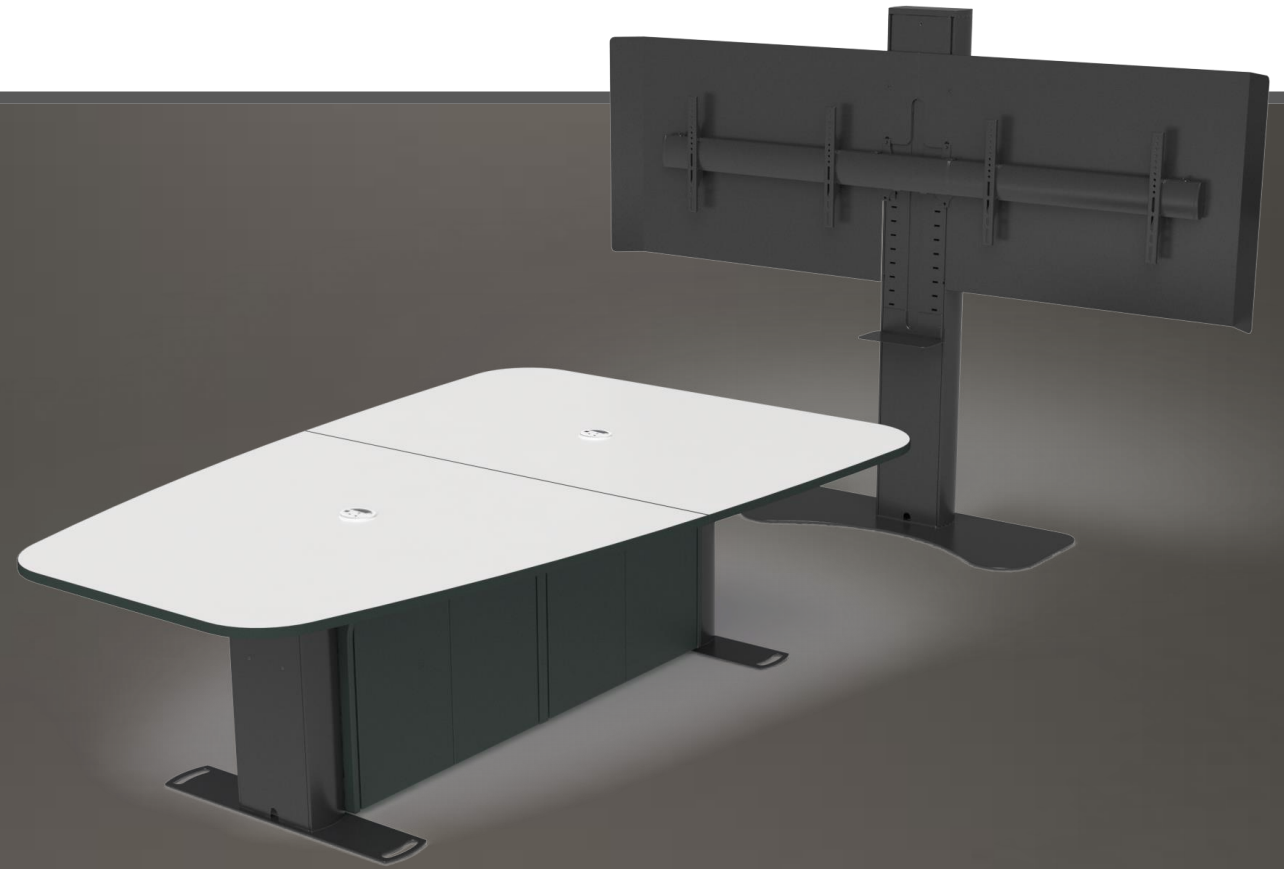

Collaboration Tables

Height Adjustable

Based on the Alliance Collaboration table we had a requirement for a height adjustable version. Here you can see the 5-seat version.

The base unit has two compartments, one can be for a PC and another for one of Quadra's open frame equipment rack.

There are some occasions where the screen needs to be separate from the table, here we have designed a screen tower (also comes in single screen)

The image shows a black base which has cable ways throughout. The centre cabinet has opening doors so you can access the floor box and connections. We can fit your cable cubbies, or we can supply and fit.

There are various finishes for the worktop.

Quadra can design any size or shape.

Educational Furniture

We have worked with many Universities over the years designing bespoke furniture from lecterns, collaboration huddle tables and screen stands with cabinets below for the tech, to custom made screen towers for the end of laboratory benches.

We have a wide range of lecterns with custom control panels, teacher desks, workstations, media walls and monitor stands.

We pride ourselves on value for money, great design and well-made pieces of furniture. With that in mind, we offer a 10-year fair wear and tear guarantee on the items we manufacture. For the items we supply from others we pass on their guarantees

Alliance

Our Piqo range of trolleys, stands and brackets are manufactured in the UK in alloy & mild steel with a powder coat finish.

We can add cabinets to our standard trolleys and fixed stands, all built around a robust and adaptable metal frame system that includes integral cable management.

Boardroom Tables

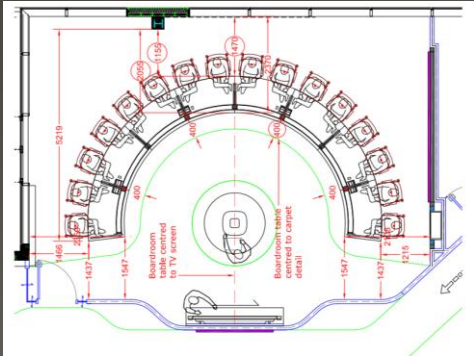

Boardroom Tables - Bespoke

RECENT PROJECT :

We worked on this boardroom table project for a leading textiles company. We received the below design from the architect, from this we designed the table for manufacture.

Once the finished design was agreed we were able to manufacture and install this table into the room. This included the Evoline pop up data and power ports. Other AV connections were done by the AV integrator.

We design and manufacture all shapes and sizes of table.

Boardroom Tables - Styles

Every customer has a different requirement for style, finish and size of table.

The main shapes for tables are Barrel, Tapered, Rectangular, Wishbone or U shaped, if you require something more bespoke Quadra can assist in the design. If you have a design from an Architect, we can work it into build drawings and manufacture.

Boardroom Table - Finishes

Gold+

With the Gold+ standard you have a 30mm thick table top with hardwood lipping's, two veneers – inner crown cut veneer and outer cross band veneer which is separated by a 5-6mm black inlay. Finished in 30% clear lacquer.

Gold

With the Gold standard you would have a 30mm thick table top with hardwood lipping's, one real wood veneer finish – this veneer will run the shortest width of the table so where the leaf's meet the grain blends with the join. Finished in 30% clear lacquer.

Silver

With the Silver standard you would have a 25mm thick table top with 2-3mm real wood veneer edging. One real wood veneer finish – this will run the shortest width of the table so where the leaf's meet the grain blends with the join. Finished in 30% clear lacquer.

Bronze

With the Bronze standard you would have a 25mm thick table top with 2-3mm abs edging. One melamine finish – this will run the shortest width of the table so where the leaf's meet the grain blends with the join.

We offer 4 levels of finish.

When quoting which you can see to the left, as most customers do not know what they require from finish to budget so we like to offer options from entry level with standard 25mm thick melamine's to 30mm thick with hardwood lipping's and 2 veneers with a dividing inlay.

Quadra AV Furniture source the highest quality hardwoods and real wood veneers. The varying grain and figure of these woods genuinely emphasise the natural beauty and individuality of the material. No two pieces of timber are identical and there will be natural variations in the grain, knots and colouring. This arises from natural minerals in the wood.

There are an infinite number of finishes for boardroom and meeting room tables, from Melamine to veneer.

To find out our customers expectations Quadra will visit site to survey the whole room and discuss layouts with the end client and our trade customer.

Once we know the key details such as table shape, number of seats, connectivity and finish we can produce a photo realistic visual so everyone can see exactly how it will look in-situ.

Kaigi Huddle Spaces

Our Huddle booths are called Kaigi which is Japanese for meeting. To see more on this go to www.Kaigi.space
The Kaigi range has been designed as a response to the current demand for huddle spaces and offers an unparalleled level of quality, value and craftsmanship, brought together into one simple beautiful offering.

Kaigi Huddle Spaces

Kaigi Huddle space furniture can be specified as a high back booth, for occupancies ranging from two to six, as a high back sofa, in single, double and triple seat units and as a range of workstations.

As the Kaigi range is a panel-based system, featuring a patent pending, tool free, quick release mounting system, it can also be assembled into numerous configurations, to define areas in open plan spaces.

The addition of power modules and monitor screen mounting options give Kaigi the ability to be customised to exact requirements.

Courtroom Furniture

RECENT PROJECT : FULL COURTROOM FURNITURE FIT OUT

Client's brief:

Build full custom-made court room furniture including tables for press and gallery for enquiry

Enquiry Furniture

Special requirements included : Tilting monitor inserts on desktops, custom desk top lectern for lead counsel, complete second set of courtroom furniture that was to be easily transportable for when the case goes on the road, power and data points.

Control Rooms

Quadra can design and manufacture furniture for your control room.

Whether you just need one control desk, multiple desks or a full-on video wall, we can help design the right look and feel for you.

When we design these desks we take into account all the equipment you wish to use and also consider the cable routes.

Quadra AV Furniture have designed a standard range of control room furniture, from control desks, rack cabinets and media walls for any type of control room. We have the Responder, Command, Principal, Progression Range.

From fixed seated height to height adjustable.

Library

School Library

We were approached via a customer to design and fit out a Library for a secondary School. The School had an empty space where we attended site and completed a full room survey. We then provided full CAD plans of the floor layout for sign off before manufacture.

Complete Room Solutions

We have designed and built many boardrooms / meeting rooms that have matching tables, media walls, credenzas and so much more!

We can now also supply acoustic treatment to your room as part of the package or separately if required. These can be a Cara fabric colour or a print of your logo or even a picture which hides the fact it is acoustic treatment. Whatever your needs, Quadra are here to help.

Your clients receive made to measure furniture which not only incorporates their new audio-visual equipment, but it fits the size, shape and finish of the room too.

If you require a sideboard with an electrical lift to raise the screen for use instead of a full media wall, Quadra can design, manufacture and install.

If you are renovating your full room and would like just one contractor to run the project, we can either work for your contractor or we could run the project for you! We work with Audio Visual experts, carpet fitters, decorators etc.

The Quadra Difference

All furniture is produced and made at our York factory. We always try and source local UK products which complement our offerings.

Over 28 years of experience within the AV furniture industry, working along side various AV integrators. This has given us great insight to potential problems.

We pride ourselves on our reputation of being approachable, friendly & reliable. If you have a project, please do contact us for a free no obligation quote

The team can react, adapt and respond to changes during a project life cycle saving valuable time and money without relying on outsourced elements. From the Sales team – Design – Manufacture to installation we are here to help.

Installation and products are fully guaranteed.

Our website is a useful tool which has product pages with information on our ranges.

On the top of the page there are two tabs for Case Studies and Brochures.

The Case Study page showcases projects that we have recently undertaken, from universities to corporate boardrooms. These give an insight into our products and also says what the customer thinks about Quadra and our products.

The Brochures have a wealth of products within each section. When we first set out these were all in one booklet but as the range and offerings increased, we had to separate into individual brochures. They are all downloadable in a PDF format.
